Catch Photo Verification Instructions

- Be sure to fill out the Catch Sheet completely after each release. Take a smartphone picture of the angler and fish prior to release as proof of all fish caught.
- If you think the fish is a contender in one of the "largest fish" categories, measure the length curved fork length and girth taking a smartphone photograph of both measurements with the tape clearly readable. Record the angler's first and last name, species, length, girth, and how the fish was caught.

- Please tag as many bass as possible with the Gray FishTag research tags provided and keep careful records. Measure and photograph tagged fish for verification. DO NOT KILL ANY FISH. This is a no-kill tournament.
- BE PATIENT. Everyone wants to know whether they caught an award-winning fish. The Scoring Committee will be working as quickly as possible to calculate the weights and determine the winners.
